JOJIE LAD LANETE

Full-Stack Developer | Remote (Philippines)
lanetejlad@gmail.com | +63 976 027 5569 | linkedin.com/in/JojieLadLanete | github.com/lanetejlad

Professional Summary

Detail-oriented Full-Stack Developer with over 2 years of experience developing responsive web applications, building RESTful APIs, and refactoring enterprise HR systems. Proven track record modernizing legacy HRIS architecture, implementing robust role-based access control (RBAC), and optimizing database queries for 1,000+ users. Committed to test-driven development, mobile-first design, and pragmatic AI-assisted workflows with disciplined manual verification.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Vite, Tailwind CSS, Mobile-First / Responsive UI, HTML5/CSS3

Backend & Databases: Node.js, Express, RESTful APIs, PostgreSQL, MySQL, Database Schema Design, RBAC, Authentication (JWT, 2FA)

Testing & Tools: Jest, Vitest, Git, GitHub (PRs, Code Reviews, Branch Management), Vercel, Sentry, Postman

Workflow & AI Tools: Cursor, Claude Code, GitHub Copilot, Monday.com, Automated CI/CD Pipelines

Professional Experience

CTC BPO — Cebu, Philippines

Software Engineer | May 2024 – Present

- Built and refactored core modules for an enterprise Human Resource Information System (HRIS) serving 1,000+ active internal users, reducing page latency by 60%.
- Developed component-driven, responsive UI screens using React, ensuring seamless mobile and desktop usability.
- Designed and maintained secure REST API endpoints, normalized database schemas, and implemented strict Role-Based Access Control (RBAC) to safeguard sensitive payroll and workforce data.
- Authored automated unit and integration tests (Jest) for core business logic, permissions, and calculations prior to shipping code.
- Built a custom two-factor authentication (2FA) service routing one-time passwords via REST APIs, cutting login friction by 20% while enhancing account security.
- Leveraged AI coding assistants (Cursor, Copilot) with rigorous code review, test verification, and debugging to accelerate sprint delivery while maintaining 100% code quality standards.
- Collaborated via Git/GitHub through structured branches, descriptive pull request documentation, and active peer code reviews.

Remie Australia — Remote

IT Systems Consultant (Part-Time) | January 2023 – April 2024

- Managed system configurations, endpoint security, and compliance protocols across a distributed remote team of 30+ contractors, sustaining a 99.8% network uptime rate.
- Conducted regular security audits and configured secure developer environments, decreasing vulnerability flags by 45%.

Proweaver Inc. — Cebu, Philippines

Web Developer | August 2023 – December 2023

- Developed and deployed 150+ custom, mobile-responsive web applications using modern JavaScript and PHP, maintaining 100% cross-browser and cross-device compatibility.
- Optimized asset delivery, DOM structure, and critical rendering paths, driving an average 15% increase in Google Lighthouse performance scores.

Education

University of Southern Philippines Foundation | *2019 – 2023*

- Bachelor of Science in Information Technology
